A dictionary is a book which contains words and their meanings.

Words in a dictionary are arranged alphabetically. Besides,
dictionary also shows how words are pronounced. It goes ahead to
give the abbreviations and classes of words, that is the parts of
speech where words fall.

One can easily learn how to stress and sound words if one is willing to look up those words in a dictionary. That is why our teacher of English always advises us to have dictionaries in our class. He told us to buy. Oxford Advanced Learners' Dictionary or Cambridge Dictionary. During the lesson, he always refers us to the dictionary whenever we come across difficult words.

Apart from a dictionary, there is also a thesaurus. It is a book which contains synonyms. We also use a thesaurus during time for lessons. That makes the learning of English very easy and interesting.

However, there are other children who do not own dictionaries. The teacher always advises them to tell their parents to buy one for them. A dictionary costs around 50,000/=. One can access them at any bookshop in the city and other towns.
